

FEATURING A 52" WALL

THE GENEVA

presented by:

the story...

The Geneva Falls begin where the thundering Geneva Creek splits into two channels, cascades then plunges in side-by-side falls, before gathering into one channel again and dropping over a half-dozen additional tiers on its way to join the North Fork Crystal River. Though the falls are clearly visible from parts of the Geneva Lakes, in Gunnison County, Colorado. The entire waterfall is difficult (if not impossible) to see collectively due to the way the stream changes direction as it falls.

What's not difficult to see in its entirety is the value and beauty of the Geneva Aboveground Pool from Blue Cascade. This 52" all steel pool features a 6" top rail, beautifully sculpted posts and the Starlite exterior design in the new neutral Pewter Gray. This is a great aboveground pool for you, your family and friends. Every Geneva pool is manufactured in the USA and features a Vinyl Works deluxe interior finish, also fabricated in the USA.

THE GENEVA
